Integrated browser with surf and phishing protection	■	■
Tracking and alarm features	■	■
QR code scanner	■	■

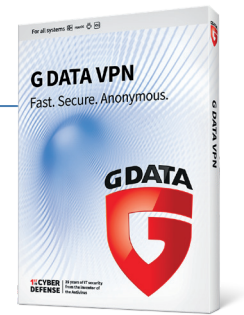

# Stand-alone solutions

Perfectly coordinated with the operating system of your choice.

## G DATA VPN

Protect your privacy quickly and reliably with G DATA VPN. Our app offers you unlimited encrypted traffic on your devices (Windows, macOS, Android, iOS). A huge selection of high-speed VPN servers in over 75 locations worldwide provide unparalleled anonymity and security when streaming or downloading data.

**System requirements:** Windows 11 / 10 / 8.1: 1 GB RAM (32-Bit) 2 GB RAM (64-Bit) | macOS 10.15 and higher | iOS & iPadOS: iOS 13 and higher | Android 5.1 and higher

## Antivirus Windows

Essential protection for your PC. Whether you're doing your online banking, shopping, or just surfing the web – we'll protect you across the Internet. Next-level technologies protect you against the latest malware, extortionists, and scam e-mails.

**System requirements:** Windows 11 / 10 / 8.1 / 7 (SP1): Min. 2 GB RAM (32- & 64-Bit)

## Antivirus Mac

Enjoy full, unlimited security for your Mac. Risks to your device are immediately detected and removed. Integrated web protection blocks malicious links before you even have the chance to fall into their trap. Simply check new files or entire USB sticks for any nasty surprises via drag and drop.

**System requirements:** macOS 10.15 and higher / 2 GB RAM

## Mobile Security Android

Protect your mobile life from viruses, harmful apps, and data theft – just as reliably as you would on your PC. If you happen to lose your device, then you can track it down or delete all data remotely at any time. Conveniently configure what content your children can view online and how long they use your device via parental controls.

**System requirements:** Android 7.0 and higher

## Mobile Security iOS

The integrated browser protects you while you surf on your iPhone or iPad. Manipulated or fake websites are immediately blocked – which means that your online transactions remain secure. The tracking and alarm feature allows you to find your device again at any time. The QR code scanner checks whether malicious links are hiding behind the black and white squares.

**System requirements:** iOS 14.0 and higher
